<p>a. EASA-5196 dated 22 May 1959  b. BAW-11190 dated 3 April 1958  c. EAVA-19151 dated 11 February 1958</p> <p>1. Although GAPAX (IDENTITY-1) has been considered for various operational assignments in the past there is no evidence in Headquarters that he was ever actually used. Reference C expressed interest in GAPAX for possible use against Satellite targets and stated that he was living in Kitzbuhel where he was the representative of IDENTITY-2. Reference B was in answer to Reference C and transmitted biographic data available to Headquarters. We find no subsequent information concerning either GAPAX's location or his employment, and presume that he is still employed by IDENTITY-2.</p> <p>2. Headquarters has no objections to the use of GAPAX as a spotter for staybehind assets in UW area #3, if you feel he would be productive in that capacity. Should you decide to use him, please submit PRQ Parts I and II along with up-to-date field traces so that we may secure an operational approval.</p>
